KURE CMS Design Ideas/Request/Checklist
-How is EAS logging worked into this?
-When a DJ submits their playlist, maybe it can be logged via DJ profile for public viewing?
-Displaying "new albums" should be made public to all, not just DJ's via dashboard? We could have a "newest additions" section on our site that includes ALBUMARTWORK | LABELINFO for each addition

Priority Coloring: **High Medium Low ~~Complete~~ In Progress (subtasks get color)**

- **Login System**
- **DJ Dashboard**
  - Transmitter Log Signin
  - Playlist Submission
    - Autocomplete
  - Grant Reader
    - Tells DJ next Grant, PSA, or KURE Event Reader to read
    - Displays Reader
    - Records if/when read
  - Digital Library
    - Displays "Heavy Rotation" moderated by MD
    - Displays "Top Plays" generated by DJs
    - Displays "New Albums" generated by Date
    - Search the KURE Catalog
      - If we can come up with a search mechanism that isn't a (*cough* terrible *cough*) SQL Search
  - Bug Submission/Feature Request
  - DJ Profile
    - Allows DJ to edit:
      - Public DJ Profile
      - Show Description
      - Show Name?
- **BOD Dashboard**
  - Transmitter log viewer
